

selfdriven Organisation

The selfdriven Foundation & Cloud Services (Apps & API).

Two Interdependent Organisations Working Together

Each with its own purpose, structures & governance.

The Foundation

Functions as an Autonomous Organisation.

The governance and direction are determined by the SDF token holders.

Focused on research and engagement with the framework as an Open Source (CCO) protocol - with a focus on creating a least-harmful society.

Supports education about the value and technology of blockchains, specifically Cardano, with the aim of creating decentralised societies and promoting self-sovereign identity

[Foundation Team →](#)

Cloud Services

Operating as Australian Registered Business (selfdriven Pty Ltd).

A team that covers the Direction, Engagement, Lab & Operations zones.

Runs the services to support the common **Apps & API**.

Has agreements with learning-communities to provide the **Apps & API**.

Can provide professional support services as required.

Tokens

Each organisation manages the keys for token generation on the Cardano blockchain.

The Foundation

SDF Tokens

These are based on human obligations and effort.

Cloud Services

SDI (SDV), SDA, SDAX, SDD, SDL & SDC.

These are based on the activity data managed within the Selfdriven Cloud Service.
