selfdriven
Launch

Launch a project to improve your community or another community.

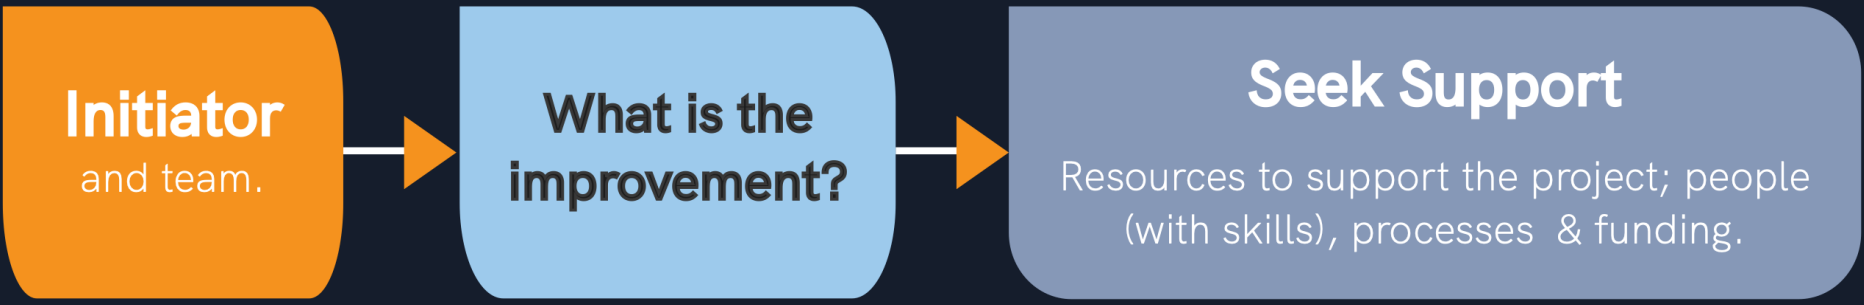

Launch project.

A place for a community to launch projects that improve their community or another community.

selfdriven provides …

- Processes - e.g. the improvement cycle.
- Structures - e.g. the app for project & task management and communication.
- Access to community members - with aligned skills, based on the selfdriven Univeral Skill Set.
- Connections to funding - from within the selfdriven Community (based on voting) or on-chain launchpads like cardashift.com.
- On-Chain governance - using OctetDAO framework.

The Process

Initiator and team. → What is the improvement? → Seek Support — Resources to support the project; people (with skills), processes & funding.
